By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

Project Summary

Our application will be a one stop place to get all the info they could possibly need during an election season. It will include info about their candidates, their platform and how they can vote.

ER Diagram

Changes:

- Specified the type of iSA (partial + overlap) per the TA's suggestions
- Added a many to one relationship between Ballot and Polling Station
- Renamed Riding Code to ID, and Polling Station ID to Name for clarity and consistency purposes
- Changed Parliament attribute Number to Address
- Broke down Address into Street Address, Postal Code and City
